# e-BRIDGE Job Separator eX

Batch printing made easy

- Simplify the sorting and distribution of documents in multiple sets with batch printing

- Easily identify each batch with customised separation pages

- Save your settings for future applications to increase your productivity and save time

- e-BRIDGE Job Separator eX™ operates directly within your Toshiba Universal Print Driver

Easy-to-use intuitive interface is accessed within Toshiba's Universal Print Driver

TOSHIBA

Effective documents, properly distributed for less cost

Toshiba e-BRIDGE Job Separator eX™ further enhances your Toshiba e-STUDIO MFD with simple batch printing from any Windows application. It does this by allowing the user to create multiple sets of a job and divides them with an individually printed separation page. Think of the time you'll save from not having to manually sort large sets of documents into batches.

Scenario

The English faculty needs to print out the Year 7 Final English exam papers for the students in each class. Normally the entire year's exam papers would be printed as one set, then manually divided into individual batches for each class. This wastes a great deal of time in counting pages and dividing sets.

With the flexibility of e-BRIDGE Job Separator eX™, you simply select the number of copies needed for each classroom, enter separation page details (e.g. batch name, class name) and define any preferred settings. Once you have entered the settings and details for each job, you can then print to your desired Toshiba MFD. The jobs will be automatically printed with a separation page between each batch.
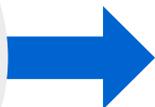

Benefits

The clear benefit of e-BRIDGE Job Separator eX™ is that no more time will be wasted on counting and dividing the print job into individual sets, improving efficiency and saving staff time for more important tasks.

System requirements

e-BRIDGE **Job Separator eX™** works on all Toshiba MFDs featuring the Universal Printer Driver.

Licence types

Node licence
Single licence for each workstation.
