

QUICK STUDY

- Simple conversion of hard copies to electronic formats that are searchable and editable
- Rid your floor space of filing cabinets with easy to create searchable electronic archives
- Save on time consuming manual retyping
- Perfect for businesses with off-premise or cloud hosted infrastructure

GET ORGANISED

Optical Character Recognition (OCR) offers an intuitive user experience making document management and retrieval easy and convenient. With a simple keyword search using industry standard formats like PDF and PDF/A accessing your documents has never been more simple.

Add to that document level security that restricts access with Secure PDF options and reduction in the size of your archives with Slim PDF and manual document management is a thing of the past!

HARD COPIES ARE A THING OF THE PAST

Send your converted hard copy documents through to cloud-based services* like OneDrive, Google Drive, DropBox, and even through your networks like SMB, FTP, Secure FTP, Netware IPX/SPX and many more!
