

Multi-Station Print

- A server-less printing solution that allows you to retrieve your print job securely from any Multi Function Device (MFD) on your network.
- Up to 50 MFD's are supported when configured in 5 departments of 10 MFD's.
- Change job settings at the MFD and even re-print previous print jobs without having to return to your PC.
- Save valuable resources by reducing time to print as well as server maintenance costs.

Challenge

You need to print some documents urgently but notice your usual MFD is busy printing another job so you delete it and print to another machine. This is such a waste of time and productivity.

Solution

The Multi-Station Print option allows you to collect your print job from any available MFD on the network and without the need of additional software or server to host it on.

With Multi-Station Print you can also change the printer settings at the MFD before releasing the print job. This allows you to quickly modify settings, without having to re-send the print job.

Your benefits

Multi-Station Print is a serverless printing solution that saves you time and resources. Not only do you save on the cost of not having to install and maintain a server, your office will also benefit in many other ways.

This solution allows you to release your print job at up to any of 50 MFDs within your network. Simply authenticate at the MFD of your choice—either by card or pin—to collect your documents. If necessary, you can even make some last-minute changes to the print settings directly at the MFD and even re-print documents without having to re-send them. This saves you time and reduces waste. Plus, your documents are always safe as they cannot be printed without you first authenticating at the MFD.

Multi-Station Print does not require the hosting of any software as its built-into the MFD's and managed over a simple web browser.

Where to use

The Multi-Station Print feature is an ideal solution for businesses and offices where users share multiple MFDs.

Education

- Increased efficiency as users no longer need to wait at a busy MFD.

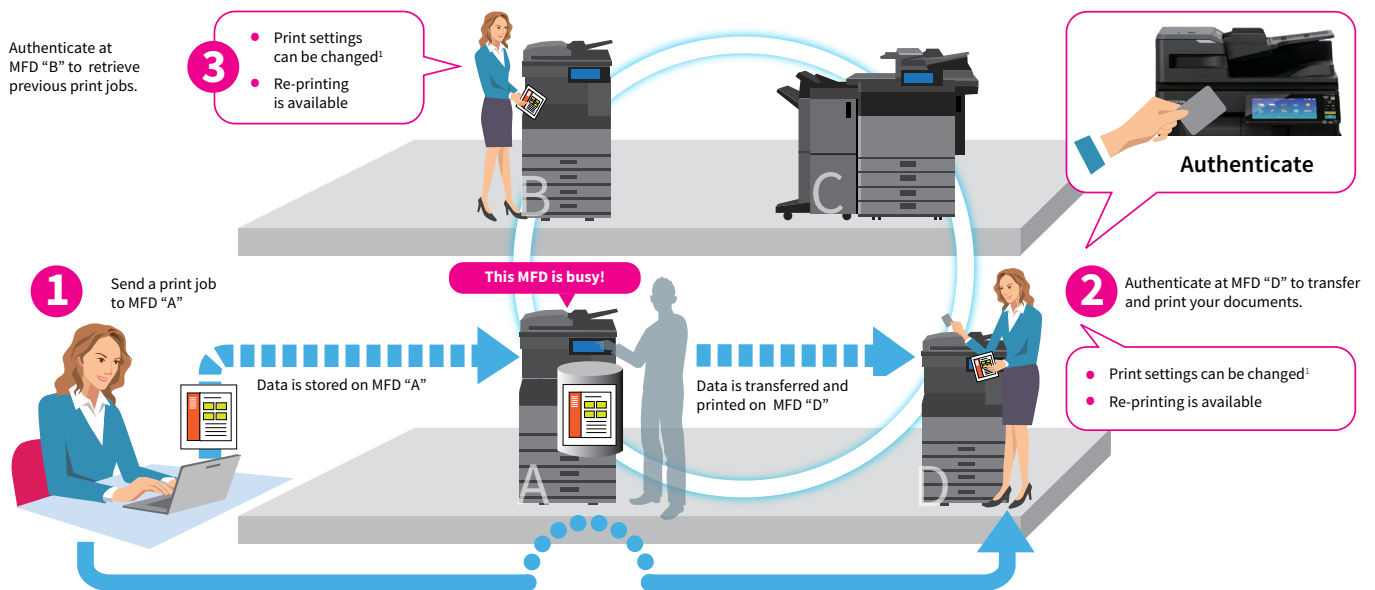

Government

- Sharing devices between different departments helps optimise the print fleet.
- Document security is ensured with secure print release.

General office

- Optimised usage of installed MFDs and increased value in your investment.
- Lower printing and paper costs.

Multi-Station Print optimises the use of MFDs and increases overall efficiency.

¹ Options available will vary according to the model and fitted accessories.
