

PaperCut™

TOSHIBA

Ensuring tailored solutions for the Australia and New Zealand market is extremely important to us at Toshiba. That's why we are partnered with PaperCut, an Australian company that delivers print management solutions locally and internationally - with support and development to best fit your needs.

A CUSTOMER GUIDE TO PAPER CUT

Easy top-up printing that drives down costs in higher education

Give intuitive 'pay for print' solutions to your student body, and unprecedented savings to your finance department.

Challenge

Universities and colleges have complex print environments where students, faculty, and staff bring a variety of different devices to campus. They need to print easily and securely, scan and digitise documents, and recover costs for students' print and copy jobs.

So if you have . . .

- ▶ massive print costs to reduce and recover
- ▶ students and staff who want to print from their mobile devices
- ▶ a need for digitised documents and easy integrations
- ▶ sensitive documents that need securing before, during, and after print

. . . PaperCut is the solution for you.

With PaperCut enabling quotas, and BYOD printing in tandem, CWRU were able to reduce faculty printing costs by as much as \$20,000 per year.

Print Room, Fab Lab, or 3D printer?

We've got you covered with a ticket management tool that makes job submission, management, billing, and delivery a breeze.

Solution

PaperCut delivers simpler-than-ever printing solutions that protect student data, recover costs, and reduce waste. Harnessing a cross-platform and vendor-neutral approach, PaperCut offers the industry's go-to tools that just work – no matter your size, printers, operating systems, or BYOD devices.

1. Recover costs with 'pay for print' systems

PaperCut has solutions for you to allocate quotas to students and departments, enable top-ups via bank accounts and popular fund systems like PayPal, and distribute prepaid print cards in offices or vending machines around campus.

You can also encourage duplex and B&W printing, send large jobs to efficient printers, and double-check if jobs should get the green light to keep costs and waste as low as possible. And why not check out all your newfound savings with 80+ built-in reports?

2. Print seamlessly from any device

Students and staff can print from their iPhone, iPad, Android, Windows, Mac, or Chromebook device with PaperCut solutions – no extras needed. Users can set up printing themselves without needing help from IT, and print natively from any app, even remotely over the internet from their laptop.

3. Take digitalisation to the next level

PaperCut has solutions for easy, two-tap scanning to get rid of manual uploads to the cloud, and eliminate frustrating lines at the printer. Scan directly to local folders, Google Drive, OneDrive, SharePoint Online, Dropbox, and many other destinations, and even make scans smart, searchable, and editable with OCR (optical character recognition).

4. Double down on data protection

With PaperCut software, you can set jobs to only release when they're authenticated at the printer, drastically reducing uncollected printouts. You can also safeguard data physically and electronically with end-to-end encryption, and protect ownership with watermarks and digital signatures.

Benefit

4 ways PaperCut enhances the print environment at your university or college

1. Save money and the planet by holding students accountable for the costs of their prints

2. Enable printing in the world of BYOD to reduce IT's workload

3. Digitise documents with the power of OCR so PDFs are searchable, editable and all-around smart

4. Secure your printing and maintain confidentiality so you can rest at ease
