**TOGETHER
INFORMATION**

FAST - ACCURATE - RELIABLE

Through understanding our customers' unique demands in the Transport and Logistics marketplace, Toshiba has developed a complete portfolio of products and solutions designed to improve efficiency, effectiveness and stream-line operations across the widest variety of applications.

Moving goods also means moving information. Without the right documentation at the right time and place, business is not possible. Toshiba offers a wide range of products which ensure that your documents are up-to-date, and available whenever needed:

Multifunction printers

Whether you need printers with a small footprint or high-speed, high-volume multifunction printers (MFP) to create commercial documents, we have what you are looking for. All our systems offer outstanding image quality and are intuitive to use.

Barcode printers

From mobile labelling at the point of need with portable printers through to wide-web pallet labels, printed on robust industrial printers, Toshiba's range of barcode printers covers all aspects of your labelling needs.

Software Solutions

Our software solutions are as individual as your needs. Converting and routing your hard copies, optimising your document output, introducing mobile printing or managing your entire print fleet - the possibilities are shear endless.

Our hardware and software solutions all integrate seamlessly into your existing workflows and networks and will help to reduce costs, manage demanding timings, whilst improving overall business efficiency in today's increasingly challenging Logistics operations.

SUSTAINABLE SOLUTIONS

Reuse before recycling

Even though more and more documents are being processed electronically, there are still many documents, which need to be printed. However, very often these documents are thrown away within only a few hours. With the e-STUDIO306LP/RD 30 Toshiba has developed a system which allows you to reuse paper and save up to 80% of resources.

Only pay for what you need

Finding ways to reduce power consumption is becoming more and more important. So why pay for electricity you do not need? Toshiba's Energy Manager for office is a smart software solution, which optimises the power consumption of all PCs and MFPs within your network. Not only will this cut your energy costs, without impacting your productivity, you will also contribute to a greener tomorrow.

Toshiba Managed Services: Greater than the sum of its parts

The combination of reducing wasted paper and energy consumption is a sure-fire way to ensure that you can fulfil your goals to reduce environmental burdens associated with your business, while improving control of IT assets and realising cost savings all in a single stroke.

There has never been a better time to talk to us about the future.
