

TOSHIBA SOLUTIONS FOR HEALTHCARE

Stay compliant while simplifying everything from patient intake to record searching, and even patient invoicing.

TOSHIBA

TOSHIBA SOLUTIONS FOR HEALTHCARE

In the healthcare industry, patient care is the primary concern. By automating your business processes you'll be able to minimise time and resources spent on manual tasks and ensure accurate records with lower operating costs. This all helps to create more time to focus on what matters most.

BENEFITS FOR HEALTHCARE

Efficiency

Automated workflows help to streamline processes, allowing staff to spend more time on patient care.

Environmental Responsibility

By converting paper files to digital and managing printing, you reduce waste.

Compliance

Ensure your patient records management meet regulatory standards for privacy and security.

Cost Reduction

Streamlined processes mean staff are more productive and eliminate unnecessary cost.

Enhanced Patient Experience

Efficient admissions and clear information for a stress-free visit.

SOLUTIONS FOR HEALTHCARE

WASTE REDUCTION AND COST MANAGEMENT

Efficiencies are key to keeping costs down in healthcare facilities. We'll help you increase productivity by enabling you to print to a queue and release prints at any enabled device. By enforcing rules, printing is easily tracked and if needed, restricted by user authentication. Costs can then be allocated and recovered as required. Toshiba can also enable printing from mobile devices for added convenience.

COMPLIANCE THAT MATTERS

Maintaining regulatory compliance is essential to any healthcare facility. Toshiba has developed specific applications to safeguard patient information and meet compliance. From functions that allow you to store and access patient records securely to solutions that identify when, where and how records are printed or even raise an alert when an illegal action is performed.

PRACTICAL PATIENT ADMISSIONS

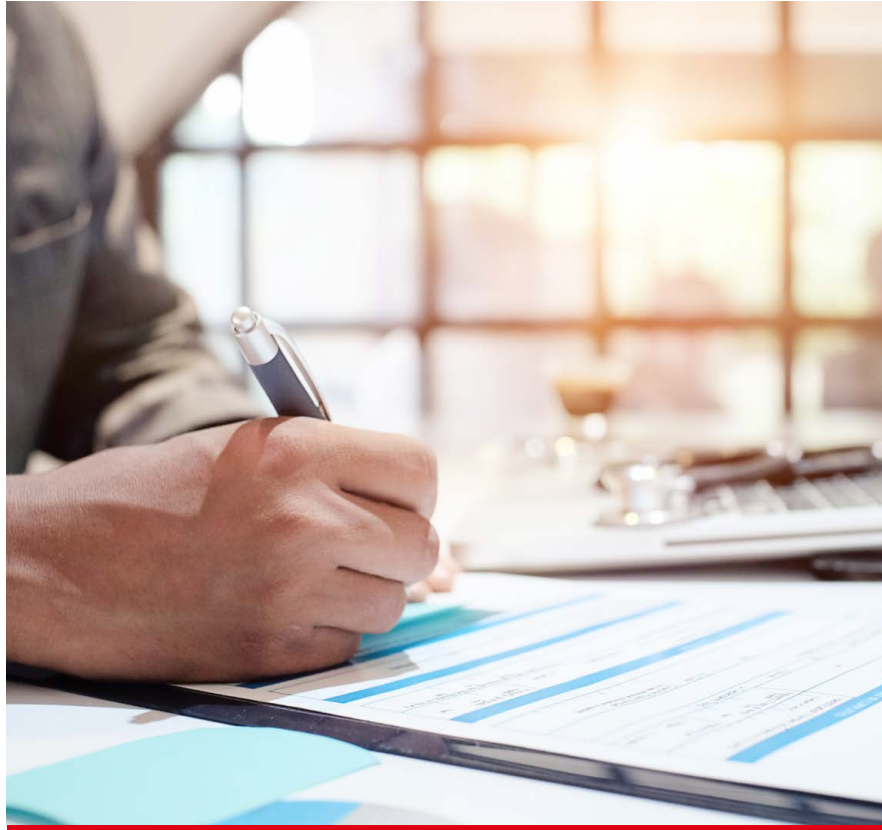

We can help you efficiently manage patient records by converting documents into digital files, setting up shortcuts to automatically route documents to the most appropriate locations and making sure that every record is quick and easy to find.

OPERATIONAL MANAGEMENT

Limited funds and staff shortages often mean running a healthcare facility that relies on efficiency across a whole range of processes including purchasing, invoicing, personnel management and building maintenance. Efficient scanning and document identification with automated workflows combine to streamline these processes - with one-touch functions reducing the time they take, minimising staff intervention, increasing accuracy and reducing costs.

EFFICIENT LABELLING

Toshiba Label Printers provide the mobility to administer pharmaceuticals at the bedside or the power to perform on-demand high-output batch printing of GS1 barcodes. Our Cerner certified printers are ideal to track and manage patient details with RFID tags available for the ultimate automation experience. Toshiba also provides a full range of approved consumables to label all manner of healthcare applications from patient wrist bands to blood bags.

RECORDS AND PRIVACY

The Privacy Act requires your data sources to securely hold staff and patient records preventing access by unwanted parties. Privacy and security are essential, but so is rapid and efficient retrieval of information for access and collaboration. Our information management tools deliver stringent security, combined with record tracking and powerful search tools for better patient, customer and employee experiences.
