

## Cloud Storage Apps

### Highlights

- > Upload scanned documents directly to your OneDrive, Google Drive, Dropbox and box cloud storage at the MFP
- > Scan to industry standard documents formats including searchable and editable types
- > Conveniently print documents stored in your OneDrive, Google Drive, Dropbox and box cloud storage direct from the MFP panel
- > Familiar tablet style interface requires virtually zero training to use
- > Single sign-on means no need to Authenticate twice
- > Minimal IT support with embedded on-board processing
- > No middleware perfect for businesses with off-premise or cloud hosted infrastructure
- > No limit on the number of users or OCR scans

### Your Challenges

The working environment is constantly evolving towards a paperless office due to the digitising of hardcopy documents. However, the process of uploading hard copy documents to your cloud repository is normally a multi-step time consuming process. Further printing documents requires access to a PC or mobile device.

### Our Solution

Toshiba's cloud storage apps offer a convenient and efficient way for users to access their cloud repository right at the MFD panel and all without the need of a PC or mobile device. With single sign on connecting is just one touch away for direct scanning to and printing from your account.

NEW... with Toshiba Cloud Storage Apps

Uploading a hard copy or printing a stored document is quick and easy

# SCAN & PRINT MOBILE DOCUMENTS

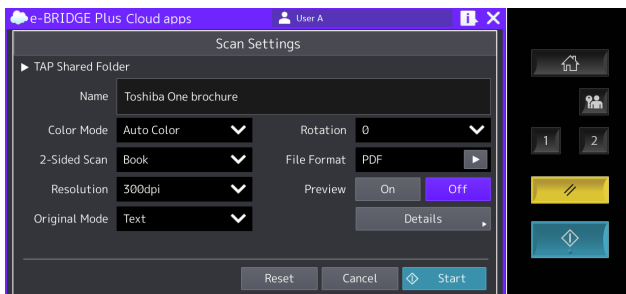

## SCANNING MADE EASY

To scan a document to your OneDrive, Google Drive, Dropbox and box cloud storage simply select the document type, folder then scan. And with single sign on just badge on, touch the app icon and your connected to your cloud account.

## FLEXIBLE SCAN SETTINGS

Conveniently, you can modify scan settings directly from the tablet-like touch screen then mix scanning between the document feeder and glass, as required.
