

# TOSHIBA

## Kōdo Email

### Smarter, safer scan-to-email starts here.

#### Email, reimagined for today's workplace

Traditional scan-to-email is often limited, insecure, and disconnected from the way people work today.

Kōdo Email transforms the scanning experience at the Toshiba MFD by connecting directly to your cloud identity using modern authentication delivering a seamless, secure, and familiar experience every time you scan.

#### Key Benefits

##### Seamless, Secure Integration

- Native compatibility with Microsoft Entra ID and Google Workspace environments
- Built on modern authentication protocols to safeguard user access
- Direct mailbox connectivity for a tailored, user-specific experience
- Fully embedded solution—no middleware required for rapid deployment

##### Intuitive User Experience

- Quick-access templates for Email, Personal Email, and predefined destinations
- Smart “sticky” settings to streamline repeat tasks
- On-panel thumbnail verification with page count and easy edit options
- Clean, adaptable interface designed for effortless adoption across teams

##### Enhanced Workflow Productivity

- Image and searchable/editable file formats are standard
- Intelligent batch processing with split options via interval or barcode
- Built-in image enhancement delivers consistently professional results
- Global address list selection without the management overhead

# Transform your document workflows today
